DETAILED ACTION

Claims 1-3 are pending in this application.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1 recites the limitation "the recipient" in line 4. There is insufficient antecedent basis for this limitation in the claim.
4. Claims 2 and 3 contain the same deficiencies as claim 1 through dependency and, as such, are rejected for the same reasons.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

Art Unit: 3628

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Sansone, U.S. Pat. No. 6,549,892 (Reference A of the attached PTO-892).

7. As per claim 1, Sansone teaches a method for dispatching postal parcels comprising the following steps: inputting a delivery address for the delivery of the postal parcels (column 4, line 14; column 7, line 60); changing at least one of (i) the delivery address according to a routine predefined by the recipient (column 3, lines 65-66), and (ii) the delivery address as a function of free compartments of at least one parcel compartment system; and, delivering the postal parcels to the changed delivery address (column 2, lines 38-39).

8. As per claim 2, Sansone teaches the method of claim 1 as described above. Sansone further teaches assigning a recipient identification code to a recipient, wherein the code is linked to the delivery address (column 2, lines 24-25, 32-33).

9. As per claim 3, Sansone teaches the method of claim 1 as described above. Sansone further teaches carrying out the delivery step (c) as a function of data contained in a table (column 3, lines 54-56).

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Deans, et al., U.S. Pat. Pub. No. 2003/0208364 (Reference B of the attached PTO-892) teaches an apparatus for delivering a physical item such that an indirect address code is added to a physical item, subsequently evaluated into a deliverable address, and associated to the item to enable in delivery of the item.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel P. Vetter whose telephone number is (571) 270-1366. The examiner can normally be reached on Monday through Thursday from 8am to 6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Hayes can be reached on (571) 272-6708. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
